

SOFTWARE ENGINEER, BACKEND / PLATFORM

BERLIN ENGINEERING FULL-TIME

Anyon's passionate team builds and invests in real estate technology. With our strong ecosystem including experts, infrastructure, customers, and capital we have a unique position to turn a variety of innovative ideas into reality.

Our first venture, Briggen, has the mission to make your facility work for you. Briggen combines cutting edge, highly secure, technology for streamlined identity and access management, indoor navigation, and workplace assistance.

YOUR MISSION

- Write server side code working with large-scale distributed systems
- Design, implement, and manage the platform from end to end ("You build it, you run it")
- Constantly solve exciting challenges
- Be responsible for the work and solutions you provide for the users
- Collaborate closely with product managers, designers, and other engineers to create state-of-the-art products for our customers

YOUR SKILLS

- Several years of experience (2+) with Ruby on Rails, databases, and distributed system frameworks
- Deep understanding of the web technology stack (TCP/IP, HTTP, etc.)
- Knowledge in large-scale internet service architectures (load balancing, CDN's, etc)
- Configuration and maintenance of applications such as NGINX, Redis, and MySQL
- You stay on top of current industry trends and share best-practices with your team members
- Entrepreneurial drive to create successful products

We are fascinated by technology and building great products – and if you do too, then join our team with lots of opportunities to grow – personally as well as professionally.

Interested? – Please submit your CV in English or German to jobs@anyon.com.
