

Looking for Software Engineer (f/m/d)

What We Do

Artificial Intelligence is the most promising technology for solving previously unsolvable problems such as autonomous driving, intelligent robots and smart farming. The development of these AI systems requires vast amounts of training data, which is the main cost factor. We at rabbitAI develop novel solutions that improve the quality of training data while reducing costs at the same time.

Who We Are

We are rabbitAI, a young start up with a strong background in software development, machine learning and camera system design. Our vision is to aid companies in the emerging field of Artificial Intelligence to grow rapidly. We are looking for a candidate to drive the business side of our startup.

Your Job

- Writing clean, high-quality, high-performance, maintainable code
- Develop and support software including applications, database integration, interfaces, and new functionality enhancements
- Coordinate cross-functionally to insure project meets business objectives and compliance standards
- Support test and deployment of new products and features
- Participate in code reviews

Your Skills

- Bachelor's degree in Computer Science (or related field)
- Bachelor's degree in Computer Science (or related field)
- Expertise in Object Oriented Design, Database Design, and XML Schema
- Familiarity with Computer Vision, ADAS, Machine Learning or similar fields
- Ideally several years of experience in a senior management position and proven leadership qualities, preferably in a startup or in a fast-growing company

Our Offer

- Full-time position within an "EXIST-Forschungstransfer"
- Initially TV-L E13/14 (Öffentlicher Dienst) according to Qualifications
- Opportunities to grow in a young startup
- A feedback-seeking culture that fuels personal growth
- A *really* healthy work-life balance
